

Bolt It On Transport System

Press Release | March 19, 2017

Bolt It On Transport System

Bolt It On manufactures motorcycle tie-down systems for transporting motorcycles, safely and securely, in your van, toy hauler, enclosed cargo/utility or flatbed trailer. The rack system connects to your existing floor-mounted D-rings with Bolt It On's J-Hook system. No hand tools or drilling required. The rack is assembled by sliding the desired combination of wheel chocks and tie-down loops onto the main bar and locking them into place through the use of a spring-loaded locking-pin device.
